Summary

Business Data Analyst with 4+ years of experience in data analysis, reporting, process improvement, and cross-functional coordination across investing, operations, and technical product development. Skilled in **SQL**, **Excel**, **Tableau**, **Python**, KPI tracking, data cleaning, trend analysis, and stakeholder communication. Experienced in reviewing structured data, identifying patterns and issues, improving workflows, and turning business needs into practical solutions. Also brings hands-on experience supporting a live company platform using Flask, React, APIs, databases, and AI-enabled tools in a production environment.

Data & Analytics: SQL, Excel, Tableau, Python, data cleaning, KPI reporting, trend analysis, dashboard support
Business Analysis: process improvement, workflow analysis, business reporting, financial analysis, stakeholder communication
Technical: Flask, React, APIs, database operations, AWS, LangChain, Ollama, Git

EXPERIENCE

AI / Technical Application Developer May 2025 – Present
Hommate.ca

- Worked on a live company platform, using SQL, Python, Flask, and React to support product features, data flow, and business workflows.
- Queried and structured application data to support feature development, troubleshooting, and day-to-day operational needs.
- Helped improve backend logic and database-related processes, making workflows more reliable and easier to maintain.
- Investigated issues across user flows, APIs, and stored data, then identified practical fixes to improve system performance and usability.
- Applied AI tools and LLM frameworks to support workflow automation and feature experimentation in a real production environment.

Portfolio Manager April 2023– Present
Self-Employed

- Analyze financial statements, company performance, and market trends to support investment decisions across a multi-asset portfolio.
- Manage a $500K+ portfolio, delivering an average annual return of approximately 15% over 3+ years through disciplined allocation and risk management.
- Track portfolio performance, sector trends, and risk exposure using a structured review process to support consistent decision-making.
- Identify potential investment opportunities by reviewing early market signals, company fundamentals, and broader economic conditions.

Project Management Office Specialist January 2022 – April 2023
Century InfoTech Co. Ltd

- Planned recurring meetings, prepared agendas, and tracked action items by owner and due date to support follow-through across teams.
- Maintained schedules and milestone trackers, updating plans when priorities shifted or scope changed during active workstreams.
- Worked with cross-functional stakeholders to resolve blockers, clarify ownership, and keep project updates clear and actionable.

Director and Treasurer ON October 2019 – August 2021
Chi Patisserie, Toronto,

- Managed budgeting, supplier coordination, ordering, and operational records to support day-to-day business activities.
- Built and maintained relationships with business partners and suppliers while supporting discussions on pricing, events, and collaboration.
- Improved workflow and production processes, helping drive approximately 30% year-over-year growth and about 20% profit improvement.

LANGUAGE

English, Mandarin, Cantonese

EDUCATION

Bachelor of Science in Mathematics September 2014 – June 2019
Toronto Metropolitan University, Toronto, ON

Google Data Analyst Certificate July 2023 – July 2024
Coursera

PROJECTS AND REWARDS

Data / AI Web Applications

- Built web applications using Flask, React, SQL, and LLM tools to organize data and automate simple workflows.
- Worked across frontend, backend, database setup, and local/cloud deployment while learning LangChain, AWS, and Ollama.

REWARDS

- Salad King On-Campus Student Leader Award (2018)
- RU A Leader Award from university of Ryerson. (2016)
